

# Pd Pi – Pure Data On Raspberry Pi Class With Miller Puckette Sunday 10/7

Posted on September 19th, 2012 by [theron](#) • Filed under [Events](#) • No Comments

Going to the [Raspberry Pi Hackerspace Tour](#) and looking for something else to do with your [Raspberry Pi](#)?

Then CRASH Space in cooperation with our friends at New Blankets have a class for you!

On Sunday, October 7th from 3-7 PM, [Miller Puckette](#), creator of [Pure Data \(Pd\)](#), will be showing how to use Pd on the Raspberry Pi. Pd is an open source graphical audio/video programming language used by musicians and artists all around the world, and now it can be used on the \$25 Raspberry Pi!

The class will be from 3-7 PM on Sunday October 7th. Cost is \$80 (discounts for CRASH Space members, see member list for discount codes). 30 seats available. [Sign up here](#)

**This event will be held at the [Culver City Veterans Memorial Building, located at 4117 Overland Avenue](#), in the Uruapan Room. The location is just a few blocks away from CRASH Space. There will be a reception with snacks at CRASH Space following the event.**

We will cover Pd basics, installing and using Pd on the Raspberry Pi, and show some examples of what can be done. Each student will receive an 8 GB SD card containing Raspberian wheezy Linux with Pd already installed. No experience is necessary.

Bring a computer (laptop or netbook) to communicate with the Pi, and headphones or computer speakers. We will have some speakers and a monitor set up for people to share and try out their Pi.

For those who do not have a Raspberry Pi yet, there will be kits available with a Raspberry Pi, power supply, and an Ethernet crossover cable (for connecting to a computer).

There are a limited number of scholarship seats available to teachers and students – contact [theron.trowbridge@gmail.com](mailto:theron.trowbridge@gmail.com) for more information.
